

M34 “Duce and a half” Army truck

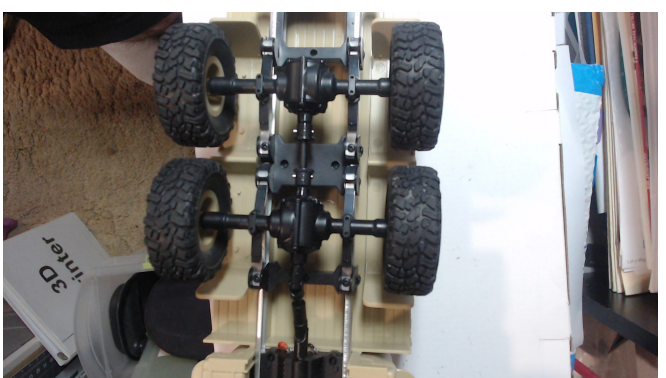

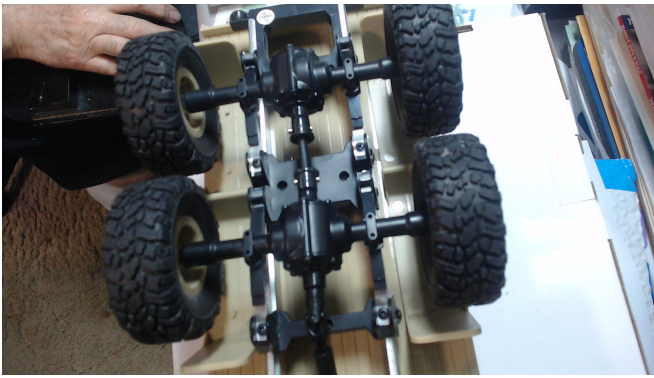

Lew Zervas

February 19, 2022

Just after WWII the U.S. military introduced a new 2-1/2 ton truck called the M34. Many were built by Reo, a popular truck building company back then. Here is that is based on the WPL RC truck which is already in 1/16 scale.

It took quite a bit of work, to make the modifications, replacing the RC receiver, the ESC and the steering servo as well as a new bed, fuel tanks, interior, and removable canvas cover for the cab.
