

Springer # 3 1/16 Scale Model Boat

By Lew Zerfas

LewsModelBoats.org, Florida

This is the third in a series of four Springer Class model boats. This one was built for Mike and is based on a real truckable pushboat that was seen near our model boat operations pond.

Springer #3, the "Jonda Ann" was completed in early August 2020. It reflects as close as possible the real boat owned and operated by Gator Dredging. The model was based on some aerial video and some photo taken by the builder (Lew) from the shore only a few hundred feet away.

Springer # 3 originated from a Zippkits "Tugster" kit. Everything from the deck on up was changed. Only the hull, shaft, propeller, and rudder were from the original kit, and even at that, some of it was modified.
